## Municipal Area Partnership Committee Looking at Regional Efficiencies

The Municipal Area Partnership Committee recommended that the Councils of the Region proceed with the restructuring of those entities presently formed as Regional Services Commissions to "For Profit Corporations".

Each participating Municipality would hold an equal share in the Corporation and as such an equal vote in the appointment of its Directors and Officers which no longer must be members of the participating Councils.

This will ensure that the Articles of Incorporation, Bylaws, and Unanimous Shareholders Agreements exhibit much stricter control over financial decisions, responsibilities, and capabilities of the corporation.

The plan is to start this process by hosting an All Council Workshop to bring forward the proposal to field questions and debate on a date to be announced.
